

# Registration requirements for the use of regulated restrictive practices

## Information for self and plan-managed participants

This flow chart helps participants and their families identify the types of supports that only a registered NDIS provider can deliver. It also identifies the options available when an unregistered provider is currently involved and using a regulated restrictive practice. These options enable participants to exercise their choice and control whilst also ensuring the necessary quality and safeguards are in place, and legislative obligations complied with. More information about [registration](#), [restrictive practices](#) and [behaviour support](#) are available on our website.

Figure 1: What supports or services can only be delivered by a registered provider?
